

Ablaufdiagramm zu den Meilensteinen, Neubau der Grundschule

The diagram illustrates the timeline of the new primary school construction project, spanning from 2012 to 2024. The project is organized into five horizontal lanes, each representing a different functional area:

- Entscheidungsfunktion (Decision Function):** This lane contains the highest-level decisions and milestones. Key events include the closure of Peter-Härtling School (2012), the establishment of the school concept by the working group (2015), the start of construction (2018), and the completion of the new school (2020).
- Standardbauteile (Standard Components):** This lane focuses on the pedagogical and spatial concepts. It includes the pedagogical spatial concept (2012) and the pedagogical spatial concept (2019).
- Planung & Neubau (Planning & New Building):** This lane covers the planning and construction phases. Key milestones include the start of construction (2018), the completion of the new school (2020), and the completion of the new school (2020).
- Planung & Bau (Planning & Building):** This lane details the planning and building process. It includes the pedagogical spatial concept (2019), the pedagogical spatial concept (2019), and the pedagogical spatial concept (2019).
- Planung & Bau (Planning & Building):** This lane focuses on the planning and building process. It includes the pedagogical spatial concept (2019), the pedagogical spatial concept (2019), and the pedagogical spatial concept (2019).

The timeline is divided by year, with months labeled at the top. The project is organized into five horizontal lanes, each representing a different functional area. The diagram uses various colored bars and boxes to represent different tasks and their durations.
